

## For Specimens Collected at the NKGen Biotech Facility

### 1 - Complete a Test Order Form

A COVID-19 Antibody Test order form must be completed by a physician. Fax the completed form to NKGen Biotech at (949) 861-9565. Instruct patient to call our facility for appointment (see step #2).

### 2 - Schedule a Specimen Collection

Patient will need to call NKGen Biotech at 949-386-6830 for an appointment. Blood samples will be collected on-site at the NKGen Biotech facility in Santa Ana, CA. A completed order form must be received by the NKGen Clinical Lab BEFORE the patient can schedule an appointment.

## For Specimens Collected at the Doctor's Office

### 1 - Complete a Test Order Form

A COVID-19 Antibody test order form must be completed by a physician. The completed form must accompany the blood specimen when submitted to NKGen Biotech for processing.

### 2 - Specimen Collection

Patient blood samples should be collected by a phlebotomist (or licensed healthcare professional) in the office or clinic. Please see NKGen Biotech specimen collection guide for more details.

### 3 - Deliver to NKMax for Processing

Blood tubes collected at a healthcare provider's office/clinic must be collected and prepared for shipment as per NKGen Biotech guidelines. Specimens should be shipped to NKGen Biotech via FedEx (or courier, if available).
